

Install Virtualbox Guest Additions in Ubuntu 14.04

BY **SYSADMIN** · APRIL 22, 2014 0

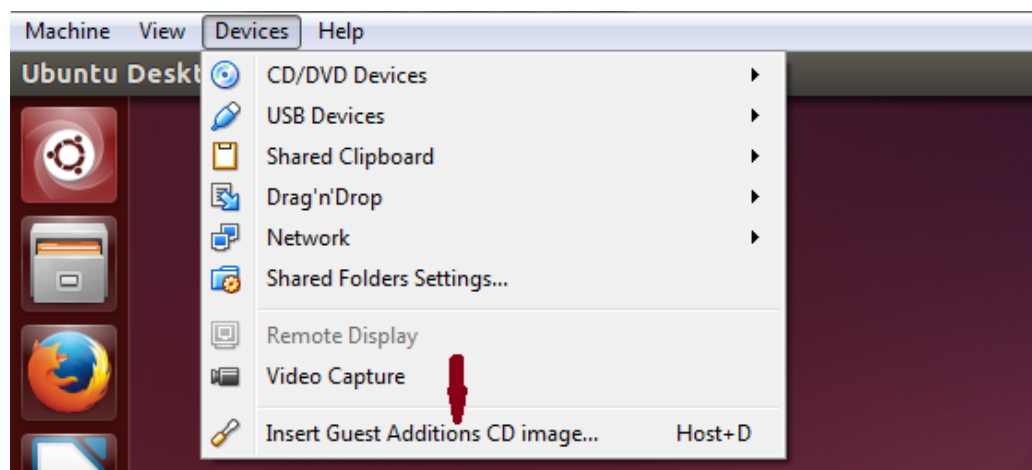

If you have recently installed Ubuntu 14.04 Trusty Tahr on Oracle VM VirtualBox Manager, you may notice that your screen isn't re-sizing and you are unable to copy and paste into the terminal even after you had set both 'Shared Clipboard' and 'Drag'n'Drop' to Bidirectional. You need to install the VirtualBox Guest Additions to resolve this. Below is **recommended** steps to accomplish that:

Install Steps

– Install DKMS (Dynamic Kernel Module Support) Package

```
sudo apt-get install dkms
```

– Mount Guest Additions CD Image...

– From terminal, run following commands. *Note your username will be different from mine and also the Virtualbox version if not v4.3.10 r93012*

```
cd /media/sysadmin/VBOXADDITIONS_4.3.10_93012
```

```
sudo ./VBoxLinuxAdditions.run
```

A terminal window with a dark background and light text. The window title is 'sysadmin@sys01ubuntu64: /media/sysadmin/VBOXADDITIONS_4.3.10_93012'. The terminal shows the following commands and output:

```
sysadmin@sys01ubuntu64:/$ cd /media/sysadmin/VBOXADDITIONS_4.3.10_93012/
sysadmin@sys01ubuntu64:/media/sysadmin/VBOXADDITIONS_4.3.10_93012
$ sudo ./VBoxLinuxAdditions.run
```

– Reboot Machine

sudo reboot
